15-inch BookScan Station Touch Screen Computer

Industry Standard

The BookScan Station 2050 Touch Screen computer is a 2.2 GHz, 15" touch screen computer with 2 GB of RAM, 160GB hard disk, 6 USB 2.0 High Speed ports, Ethernet port, and a CD-RW drive in a compact, sleek design. The BookScan Station 2050 is bundled with Windows Embedded, BookScan Station software and ABBYY FineReader Technology. Installed in over 100 public and university libraries in the last year alone, the 2050 has become the industry standard for a highly reliable, rugged touch screen technology that can withstand constant touches without degradation in sensitivity and accuracy. Visit our website at www.bookscanstation.com to see case studies about BookScan Station installations and testimonials, and the features and benefits library patrons and staff value most.

Easy-To-Use

Designed to be easy to use with large friendly buttons, the BookScan Station touch screen guides the user through the scan process including choosing the file formats, scan quality, color depth, file naming, and destinations. Scan books and documents into PDF, text-searchable PDF, JPEG, and Word file formats by simply touching the screen for the preferred file format. Searchable PDF files allow you to search for any word in the PDF file or copy text out. Word files may be opened and edited in any Word compatible text editor.

Send scanned files to a USB Flash drive, to email as an attachment, to Google Docs, to Network Folders, FTP sites or printer. Simply pick the destination on the screen and the BookScan Station software automatically routes the scanned images.

Unmatched OCR Accuracy

The BookScan Station is integrated with the ABBYY FineReader Engine for unmatched Optical Character Recognition accuracy. The FineReader Technology takes the scanned images of the books or documents and makes them machine readable in several common formats, including PDF and Word. ABBYY's multilingual document recognition engine automatically detects English, French, Italian, German, and Spanish languages.
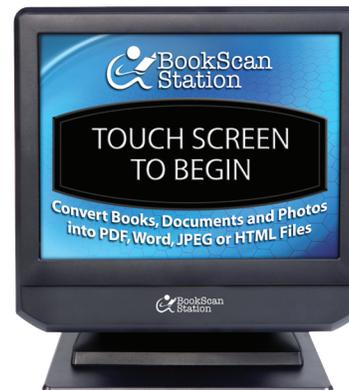

Special Features

- Compact, Fan-cooled, Dual Core Intel 2.2 GHz system

- Easy-To-Use BookScan Station software guides user through the scanning process

- Powered by ABBYY FineReader Technology for unmatched Optical Character Recognition accuracy

- Compatible with all iVina book-edge scanners and document scanners

- Optional 3-Track Magnetic Stripe Card Reader

15-inch BookScan Station Touch Screen Computer

Add-On Options

The BookScan Station 2050 touchscreen computer may be configured with any of iVina's patented book-edge scanners: the FB2080E Small Format book-edge scanner, the FB6080E Large Format book-edge scanner, and the FB6280E Large Format high-speed book-edge scanner.

The BookScan Station 2050 is designed to support scanning not only books but also documents when configured with an optional BulletScan S400 document scanner rated at 40 images per minute. The BookScan Station 2050 also supports the optional zero footprint ADF4030 automatic document feeders that connect through the FB6080E and FB6280E book-edge scanners.

The BookScan Station 2050 touchscreen computer also offers an optional 3 Track Magnetic Card Reader for identifying and authenticating authorized users.

Billing and Payment System Compatibility

The BookScan Station software bundled with the BSS2050 is Blackboard Transact certified, and supports select coin and debit card systems from Jamex, ITC, and Vendapin. The software also works with most print management systems such as Pharos, P-Counter and Envisionware.

Warranty

The Bookscan Station 2050 includes a 1-year manufacturer's warranty and extended warranties up to 5 years may be purchased. For more information, please visit www.bookscanstation.com.
